"See The Light" Launches in Major Success.

More than 250 community leaders and guests gathered at the Woodford County High School Gymnasium to kick off See The Light’s new program, “See The Light”. The event was hosted by the Woodford County Chamber of Commerce and the Woodford County Human Rights Commission. The evening included a program, food, music, and a silent auction.

The program concluded with the launch of the “See The Light” program, which will provide free vision care, including eye exams and glasses, for children in Woodford County. The program is designed to help children who may not have access to traditional healthcare.

The Woodford County Chamber of Commerce and the Woodford County Human Rights Commission are proud to support this important initiative. We are grateful for the support of our community partners, including the Woodford County Schools, the Woodford County Human Rights Commission, and the Woodford County Chamber of Commerce.

We look forward to seeing the positive impact that the “See The Light” program will have on the children of our community. We encourage everyone to support this important initiative and help ensure that all children have access to the care they need to succeed in school and in life.

Miami Lighthouse is Recipient of Best Buy Community Grant.

Miami Lighthouse is honored to announce that our Miami Lighthouse program has been awarded a Best Buy Community Grant. This grant will support the development of our program by providing necessary resources for our staff and students.

We are grateful for the support of Best Buy and their commitment to improving the lives of our students. This grant will enable us to provide quality education and support to our students and their families.

Our Teenage Program Goes to The First Of Mars.

The teenage members of the Miami Lighthouse’s Teenage Program recently went to the First Of Mars at the Kentucky Science Center. The visit was an opportunity for the students to learn about space exploration and the importance of science.

The students were able to participate in various activities, including a tour of the Space Station and a presentation by a NASA astronaut. The visit was an inspiring experience for the students, who were able to learn about the importance of science and the importance of education.

The Miami Lighthouse is committed to providing our students with opportunities to learn and grow. We are grateful for the support of the Kentucky Science Center and look forward to providing our students with more opportunities to explore and learn.

Join The Give Miami Day Movement.

Miami Lighthouse is proud to be a part of the Give Miami Day Movement. This year, Give Miami Day is on November 15th, and we encourage everyone to support the Miami Lighthouse and other local organizations.

We are grateful for the support of our community partners and look forward to seeing the positive impact that Give Miami Day will have on the Miami Lighthouse and the lives of our students.
