

# ENGAGING THE LOW VISION COMMUNITY THROUGH EDUCATION, RESEARCH, AND SERVICE

## June 4, 2016 – CCOURSE SATISFACTION QUESTIONNAIRE RESULTS

38 completed questionnaires

How would you rate...	Very satisfied	Satisfied	Neutral	Unsatisfied	Very unsatisfied
1. General organization of the conference	97%	3%			
2. Relevance of the topics chosen	100%				
3. Content of this course matched the announced objectives	100%				
4. Extent to which you have acquired information	97%	3%			
5. Expertise of presenters	95%	5%			
6. Usefulness of the information that you have acquired	97%		3%		
7. Your ability to work more effectively with low vision clients	92%	8%			
8. The venue and its facilities	100%				

9. Have you ever attended a MLB course before?

84% YES

16% NO

10. What did you find most useful/least useful in the conference?

- I found the detailed information was useful to the population at hand in incorporating it with my clients/patients.
- Billing
- Hands-on activities
- The hands-on activities were most helpful.
- Dr. Gartner's talk on vision services.
- Knowing this place existed and all of the resources for vision impaired persons.
- I gained a deeper insight and knowledge of low vision clients
- Interventions used with low vision patients
- Most useful-compensatory techniques, adaptive devices/equipment that can be used with ADLs/OT
- Handout of fall prevention was helpful. I would have liked to have handouts of all topics.
- Testing out acuity and trying to do an activity. Learning about technology and resources that are available.
- Adaptive devices, self-help devices, and insight into perspective of visually impaired
- Info, resources, technology
- Labs with assistive technology; great information from Dr. Gartner; available community resources
- Explanation of adaptations for low vision
- I found everything very useful
- The hands-on experience was great. I enjoyed the seminar
- Wonderful presentations, very informative. Presenters were great and concise.
- I enjoyed the presentation on the artificial retina and Braille

- Services available to people with visual impairments
- Great topic and good presentations
- Multiple disciplines, very useful
- Very good info; great presenters
- Compensation techniques
- Compensation techniques/assistive technology
- Apps in phone, devices available for community
- Intervention and adaptive devices for ADLs/IADLs
- Everything
- Application to the practice
- Loved the variety of experts and their knowledge. There might have been too much general, core information given on vision
- Hands-on activities and real life examples during presentations
- Reality facts; able to apply my profession
- The presenters were very informed and very passionate about their respective areas of expertise
- Info regarding falls prevention
- The knowledge of the presenters
- The hands-on experience

#### **Least useful in the conference**

- Presenter interrupting others. The blonde lady kept interrupting the one who was showing the canes. Very disrespectful!
- Fall prevention-however, with that said, the resources she educated me on were very helpful.
- Nothing!
- Too much time in the store
- Fall prevention, but only because on the setting that I work fall prevention is emphasized on a daily basis

#### **11. Which other topics would you like to be covered at future CEU courses?**

- I honestly felt that every topic that was discussed will be beneficial to OTs.
- Specific methods and activities to work with clients
- Mobility training, perspective of different visual problems
- Social security, Medicare, Medicaid, services for legally blind and state/federal funding
- Prosthetics, PSTD interventions
- How to help or approach individuals that are visually impaired
- More ADL specific strategies examples/compensatory strategies
- Satisfied
- Maybe goal writing in a setting like this one
- Lighthouse services outreach to rehab facilities, nursing homes, and home health agency patients
- Community resources
- More applications and community
- Community/school resources

- I am very satisfied with all the topics covered. In my opinion all topics of interest that I can think of were addressed
- Ipad apps
- Maybe more information on the variety of services that can be provided to the visually impaired
- Braille for beginners
- Review the recommended assessment tools during a lab of low vision for OTs
- Technology w visually impaired
- Medicare policies
- Mobility training for different diagnoses, stroke, etc.

12. Please indicate any other comments/suggestions for follow-up

- Great and helpful
- More information about how the services are funded would be helpful
- Although it was a very long day, it went by quickly and it was interesting
- The participants should be asked if she/he has any visual challenges so that they can get the best results from seminar-Some items on presentation slides were too small.
- Maybe during lunch, it could be a more engaging activity, because people start shutting down; so something to keep them up
- Thanks for the food! Generous and good. Make power points available please at course
- More hand-outs or aides, assistive technology
- Please advise of alternate parking; would love more hand-outs
- Enjoyed the course and hands-on activities
- No other comments
- Great speakers. Loved it.
- Great conference/course. Send emails for future courses
- The entire presentation was well organized and well presented. I would have liked hand-outs of the presentations to refer to for future reference.
- I really enjoyed the seminar, the organization and hand-outs were excellent resources
